

Guideline on Critical Analysis Reports (P1 & P2)

- Each individual should submit a personally written critical analysis of each topic (Transformers weeks 3-4 & Diffusion Models weeks 7-8)
- Using LLMs to generate a report is prohibited.
- Marks: 100 marks for 10% of overall assessment for each report
- Format:
 - The report must be a pdf file.
 - Each report should be NO longer than 2 pages using the provided Latex template. Modifying the LaTeX style file (e.g., changing fonts, margins, spacing) will be penalized.
 - References are not in the 2pages limit, but all references must be discussed in the report.
- Consider following questions in your report. **Note:** You must write an academic essay guided by these themes, **not** answer them **explicitly** as a list of Q&A:
 - What are the main trends on the topic since the publication of the paper discussed?
 - What are the key ideas of related published works since the original publication?
 - What are the main problems solved or improvements over the original work?
 - What are the remaining problems from the published works so far?
 - What is an unsolved problem on the topic most interesting to you to solve and why?
